INTRODUCTION

We have reached the third edition and for the third time Friuli hosts our meeting, no longer in the historic setting of the Castle of Udine, than his hill stands to dominate the city below, but in the fascinating Island of the Sun, Grado, which in turn dominates the canals and the sea routes of the same name lagoon.

However, a thin thread links these two cities, if, as is said, the populations, fleeing from the invasion of the Huns, found their own refuge on the island of Grado, while the barbarian hordes of Attila were building the hill of Udine with the earth shown in their helmets to better assist the sack of Aquileia.

It was 452 AD. Not only that, Grado boasts a consolidated medical tradition, since in 1237 a terrible pestilence was defeated and the statue of the Madonna in thanksgiving was taken to the Shrine of the small island of Barbana, in that time destined for the quarantine of the sick.

Still today, Grado excels for innovative thermal and rehabilitation treatments, which make it a center of attraction in the Central European area.

We are certainly in a hospitable and culturally fertile land that cannot betray our expectations and therefore deserves a high value scientific response.

It is not my intention here to dwell on a summary of the conference themes, already reported in a dense, interesting and I hope engaging program; I would instead like to focus on the men and the women they wanted to honor us with their presence, whose international value is well known.

I believe that Grado will be able to reward everyone, including delegations geographically more distant, but united by the same desire of knowledge and progress.

INTRODUZIONE

Siamo giunti alla terza edizione e per la terza volta il Friuli ospita il nostro incontro, non più nella storica cornice del Castello di Udine, che dalla sua collina si erge a dominare la città sottostante, ma nella affascinante Isola del Sole, Grado, che a sua volta domina i canali e le vie al mare della omonima laguna.

Tuttavia un sottile filo conduttore lega queste due città, se, come si narra, le popolazioni in fuga dall'invasione degli Unni trovarono rifugio proprio nell'isola di Grado, mentre le orde barbariche di Attila edificavano il colle di Udine con la terra riportata nei loro elmi per meglio assistere al sacco di Aquileia.

Era il 452 D.C. Non solo, Grado vanta una consolidata tradizione medica, da quando nel 1237 fu sconfitta una terribile pestilenza e la statua della Madonna in segno di ringraziamento fu portata nel Santuario della piccola isola di Barbana, allora destinata alla quarantena degli ammalati.

Ancor oggi Grado primeggia per cure termali e riabilitative innovative, che ne fanno un centro di attrazione nell'area mitteleuropea.

Ci troviamo senza dubbio in una terra ospitale e culturalmente fertile che non può tradire le nostre aspettative e che merita dunque una risposta di alto valore scientifico.

Non è mia intenzione qui dilungarmi in una sintesi dei temi congressuali, già riportati in un programma denso, interessante e spero coinvolgente; vorrei invece porre l'attenzione sugli uomini e donne che hanno voluto onorarci con il loro intervento, il cui valore a livello internazionale è ben conosciuto. Credo che Grado saprà ricompensare tutti, anche le delegazioni geograficamente più lontane, ma accomunate dallo stesso desiderio di conoscenza e progresso.
