The European School of Oncology offers oncology e-learning courses and sessions via e-ESO ([www.e-ESO.net](http://www.e-ESO.net)), a platform dedicated to providing distance learning material in the form of:

- E-sessions (live and recorded).
- Slides and videos from ESO's events

*e-ESO is a free platform created by the European School of Oncology to provide e-learning opportunities for oncology professionals and other physicians interested in oncology.*

*e-ESO gives you access to world-class experts in oncology no matter where you are in the world!*

• **e-SESSIONS, COURSES and PATHWAYS**

*e-ESO has three ways to learn online so you can find exactly the right fit for your personal career development.*

• **e-Sessions:** *e-Sessions are free, single educational lectures conducted live on the internet and are offered without any commercial sponsorship. Each 45-minute e-Session is presented by leading oncology experts.*

*Our e-Sessions are interactive and you're encouraged to ask questions. Questions sent before and during live e-Sessions will be answered live by our experts. Questions received after the e-Session will be answered by email.*

*Registration for e-Sessions is not required, but selected e-Sessions have CME accreditation so we do encourage you to register with e-ESO to make the most of your experience.*

• **Courses:** *An e-ESO Course is a series of online lectures, pre-recorded videos and panel discussions with world-class oncology experts specifically created for an area of study.*

*To participate students must register for the Course. As a registered student you'll be notified about upcoming online lectures. You will also have access to the Course's archive of material for up to a year after the live webcast. It is a great way to expand your knowledge about a specific topic whilst still fitting into your busy schedule.*

*Students registered for an e-ESO Course receive an e-ESO Certificate of Participation. Select events also assign CME credits (1 credit per hour of course).*

• **Pathways:** *Pathways is e-ESO's easy and ready-to-use series of e-Sessions, covering various important areas of oncology. With Pathways our e-Sessions are specially selected and arranged to guide your study through different topics.*

*Each Pathway is made up of a series of concise but mandatory e-Sessions (minimum 6, maximum 10 per Pathway).*

*As a registered student, e-ESO provides regular updates about your Pathways status. Once a Pathway has been completed, you will be notified and awarded an e-ESO Certificate of Participation. A completed Pathway is worth 2 ESCO credits.*

• **In the Know with e-ESO:** *Quick and easy video clips and podcasts (arriving soon), e-ESO knowledge drops feature the most up-to-date and important information on your area of interest. These bite-size clips mean you can watch or listen anytime and anywhere!*

**For more information, please visit: [www.e-ESO.net](http://www.e-ESO.net)**
