INTERNATIONAL DIGITAL SYMPOSIUM RECENT ADVANCES IN CARDIOVASCULAR DISEASES

Coronary Artery Diseases - Update on Heart Failure - Structural heart diseases

12th - 26th April - 10th May 2021

Scientific Directors:
Prof. Ciro Indolfi, Prof. Thomas F. Lüscher

RATIONALE

Cardiovascular diseases are still one of major health problem. The rational of this digital symposium is to share the recent advances in cardiovascular diseases. This educational event will be divided in three different areas. The first one will be focused on ischemic heart disease. In particular, outstanding experts in the fields will discuss the prevention and the interventional treatments of patients with acute and chronic coronary syndromes. The impact of COVID-19 on cardiovascular diseases will be also discussed.

The second area of this digital symposium will be dedicated to heart failure. New therapeutical strategies, decision Pathway for Optimization of Heart Failure Treatment and the current applications of artificial intelligence in Heart Failure will be discussed in detail.

Finally, in the third section of the meeting the new perspectives in the diagnosis and treatment of structural heart diseases, i.e. aortic stenosis, mitral regurgitation and tricuspid regurgitation will be treated by superb experts in the field.
