Scientific Rationale

Obstetric anesthesia is a set of science and art which, when properly combined, lead to a perfect outcome of two or more closely intertwined patients, the mother and her child. In recent years, changes in maternal-fetal pathology have been a stimulus for rapid developments in obstetric anesthesia, so much so that the anesthesiologist has gained a leading role in the delivery team.

This XVI UPDATE is also intended to be an opportunity to discuss the state of the art of obstetric anesthetic practice, which is constantly evolving.
The debate and the reports will stimulate us to reflect on interdisciplinary dynamics and their potential to guarantee the highest quality standards.

Scientific Director

Prof. Ferdinando Luca Lorini

Scientific Committee

Francesco Rizzo, Bergamo
Valentina Stagnati, Bergamo
Sandra Stiffan, Bergamo

XVI UPDATE IN OBSTETRIC ANESTHESIA
December 5, 2022

07.45 Participants registration

08.30 Course presentation
Prof F. L. Lorini

SYMPOSIUM ONE
Prehabilitation of full-term pregnancy: ERAS (Enhanced Recovery After Surgery) in elective Caesarean Section

Moderators: F. Caramelli, M. Carnelli, Mauricio A. Leon

08.45 Caesarean section at the time of ERAS
S. Pirola

09.15 Anesthesia and pathophysiology of childbirth and post-surgical puerperium: the tools of the anesthesiologist
E. Buelli

09.45 Nutrition, early mobilization and rooming-in: the mother-child relationship after Cesarean Section
E. Marconi, B. Pasini

10.15 Our prehabilitation protocols: data from two years of work
L. Ongaro, L. Patanè

10.45 Discussion

11.15 Coffee break

XVI UPDATE IN OBSTETRIC ANESTHESIA
December 5, 2022

SYMPOSIUM TWO
Big Mama

Moderators: Prof. F. L. Lorini, L. Patanè

11.45 Pathophysiology of pregnancy and labor in obese pregnant women
S. M. Barresi

12.15 Labor in obese pregnant women: technical and analgesic problems
M. G. Frigo

12.45 The big obese in the obstetric operating room: elective and urgent Cesarean Section
F. Caramelli

13.15 Discussion

Severe COVID pneumonia in pregnancy: evidence of treatment in the ICU
F. Donatelli

Lunch break

With the non-binding and exclusive contribution of the Menarini International Foundation

With an unrestricted Grant by

FONDAZIONE INTERNAZIONALE MENARINI

XVI UPDATE IN OBSTETRIC ANESTHESIA
December 5, 2022

WORKSHOP (extra CME)
h 15.00 - 17.00

WORKSHOP 1

Tutors: N. Barachetti, S. Bassetti, C. De Simone, M. Marchesi, P. Olivotto.

Safe delivery room

(Continuous staff training and simulations, correct dilution and preparation of drugs, sepsis box, analgesia box, pre-eclamsia box, haemorrhage box with guidelines and flow chart, perimortem blue code Cesarean Section: natural and iatrogenic causes of Cardio Circulatory arrest in pregnant women)

WORKSHOP 2

Tutors: E. Buelli, G. Mangili

Fetal well-being: neonatal resuscitation in the delivery room

WORKSHOP 3

Tutors: A. Benigni, L. Grazioli, B. Milan, L. Ongaro

Anesthesiological monitoring in the delivery room

(thromboelastography: coagulation and fibrinolysis and thrombophilic states in pregnancy, use in PPH; hemodynamic monitoring: in the operating room and in preeclampsia, arterial blood gas analysis: lactic acid in labor and postpartum hemorrhage)

WORKSHOP 4

Tutors: S. Baglioni, S. Bettinelli, E. Ciriello, G. Fierro, S. Stiffan

Rare emergencies in the delivery room: how to recognize and treat them

(AFE, uterus inversion, eclamptic crisis, pharmacological complications with emergencies related to locoregional anesthesia, failed intubation in AG: rapid decurarization and supraglottic aids. Multidisciplinary approach and clinical cases).

XVI UPDATE IN OBSTETRIC ANESTHESIA
December 6, 2022

SESSION ONE
Does physiological labor still exist?

Moderators: S. M. Barresi, G. Fierro

08.45 Induction of labor: the new frontiers
V. Stagnati

09.15 Neuroaxial analgesic techniques and their management: how do the dynamics of labor and the outcome of childbirth change?
A. Brizzi

09.45 Uterotonics: lights and shadows
M. G. Frigo

10.15 Obstetric care in labor dystocia
S. Belloli

10.45 Discussion

11.15 Coffee break

SESSION TWO
Meeting with the protagonists

12.00 CLINICAL SCENARIO:
An unexpected event

Lunch break

XVI UPDATE IN OBSTETRIC ANESTHESIA
December 6, 2022

WORKSHOP (extra CME)
h 15.00 - 17.00

WORKSHOP 5
Tutors: S. Bettinelli, C. Compagnone, M. Giunta, P. Olivotto
Infections during pregnancy
(New definitions and repercussions in obstetrics, epidemiology, the role of biomarkers, bundles, hemodynamic and fluidic management and therapy, the infectious source: how to diagnose and control it)

WORKSHOP 6
Tutors: D. Bugada, G. Mangili, C. Mario
Hands-on skill station: ultrasound in the delivery room and venous accesses
(Tap block, ultrasound assisted epidural, ultrasound-guided maternal difficult venous access, umbilical catheter positioning simulation)

WORKSHOP 7
Tutors: C. De Simone, G. Fierro, V. Mandelli, B. Milan, A. Moretto
Decision making in neuraxial technique in the delivery room
(Scores, supports for neuraxial techniques, procedures in accidental dural puncture, neuraxial analgesia in fetal malpositions)

WORKSHOP 8
Tutors: S. M. Barresi, E. Ciriello, V. Piccoli, F. Rizzo
Frequent emergencies in our delivery rooms: prevention and therapy
(Postpartum haemorrhage, the preeclamptic patient, shoulder dystocia, red coded caesarian section. Multidisciplinary approach and clinical cases)

XVI UPDATE IN OBSTETRIC ANESTHESIA
Information

SCIENTIFIC DIRECTOR
Prof. F. L. Lorini

ACCREDITED FIGURES
The course is intended for anesthesiologists and resuscitators, gynecologists, nurses and obstetricians.
It is limited in number, only the first 150 entries will be accepted.

VENUE
Centro Congressi Papa Giovanni XXIII
Viale Papa Giovanni XXIII, 106
24121 Bergamo

ACCESS TO THE CONGRESS SPACES
The use of a mask is strongly recommended for accessing the conference spaces.

UNDER THE PATRONAGE OF:

Ospedale di Bergamo
