WHO WE ARE

50
YEARS OF
FONDAZIONE
MENARINI

The “**Fondazione Menarini**” was established in the spring of **1976** to promote research and knowledge in the fields of biology, pharmacology and medicine as well as economy and human sciences.

One of the main tools the Foundation uses to achieve its goals is the organization of **international congresses** with a specific focus on medical disciplines.

FONDAZIONE
MENARINI

The logo the **Fondazione Menarini** adopted at the time of its establishment derives from a famous seventeenth-century treatise, the **Novissima Iconologia del Ripa** (Ripas’ New Iconology), rich in symbolic meanings from Parmenides to Plato’s Myth of the Soul.

The image, which depicts a man leading a horse while firmly gripping the bridle, was chosen as it effectively represents the Foundation’s goals and topics based on its **balanced interests in humanistic and biological sciences**.

FONDAZIONE
MENARINI

RATIONALE

In recent years, patient safety and healthcare environment safety have gained increasing relevance due to their significant prognostic, clinical, and medico-legal implications.

This course aims to provide a concise overview of the principal issues related to clinical risk management and professional liability within contemporary cardiology practice in Italy. Two interactive clinical-legal scenarios will be presented to illustrate the key dynamics of criminal proceedings and the different phases of the judicial process.

The course will also provide updates on major topics in clinical cardiology, highlighting the role of early-career cardiologists. Through the mentorship of senior experts, young colleagues will have the opportunity to enhance their clinical competencies and actively participate in the sessions, including through the presentation of interactive clinical cases.

In addition, a fully international session will be dedicated to recent advances and emerging developments in cardiovascular medicine, presented by leading international experts.
